

Table of Contents

Glossary.....	7
Abbreviations	9
Foreword.....	10
1. Introduction.....	11
2. Selection of best practices.....	18
3. IWT education based simulators	28
3.1 Online Education for IWT sector using gamification	34
3.2 Blended Education for IWT sector using inland navigation simulator	38
4. Engineering education based digital tools	42
4.1 Learning about Beam Pumping Units using digital technologies	42
4.2 Correction of welding techniques of professional welders (tailor made)	44
5. Virtual reality simulators for painting.....	47
5.1 Training optimization and correction of painting techniques of professional painters using a virtual reality simulator	47
5.2 Professional integration of autistic people thanks to MIMBUS Discover and more European good practice examples using virtual reality training tools in VET.....	57
6. Virtual and Augmented Reality in engineering and CSI training	65
6.1 Welding learning based in Augmented Training Methodology	65
6.2 Criminalistic inspection with Virtual Reality	67
7. Welding simulators for training and virtual tour using smartphones	70
7.1 Design of student curricula, training and courses connected to WPS-MAG 135 and MMA 111 on a Fronius Virtual Welding Training System	70
7.2 How to make a virtual tour.....	76
8. Blended teaching using different digital tools.....	83
8.1 Microsoft Teams (blended teaching / training).....	83

8.2 Kahoot (presential teaching/learning)	85
9. Facilitating classrooms and safety issues in virtual reality.....	88
9.1 How to use VR safely in a classroom setting	88
9.2 How to facilitate your first class?	95
10. Simulation of welding and online learning using digital tools.....	103
10.1 Introduction to MAG welding.....	103
10.2 Blended Learning (mixture of e-learning and teaching in a classroom) of visual testing of welded joints	106
