

Table of contents

Quasi-invariant convergence in a normed space <i>Fatih Nuray</i>	1
Some further results on belonging of trigonometric series to Orlicz space <i>Xhevat Z. Krasniqi</i>	6
On (semi)topological residuated lattices <i>N. Kouhestani and R. A. Borzooei</i>	15
Existence and uniqueness of solutions of a nonlocal problem involving the $p(x)$ -Laplacian <i>M. Avci and R. Ayazoglu (Mashiyev)</i>	30
Semi-slant warped product submanifolds of a trans-Sasakian manifold <i>Meraj Ali Khan and Amira Ishan</i>	38
A novel chaos-based image encryption scheme <i>Ana Cristina Dăscălescu, Radu Boriga and Marius Iulian Mihăilescu</i>	47
Discrete Emden-Fowler problems driven by nonhomogeneous differential operators <i>Maria Mălin</i>	59
Renormalized solutions for a class of nonlinear parabolic equations without sign condition involving nonstandard growth <i>Elhoussine Azroul, Mohamed Badr Benboubker, Hicham Redwane and Chihab Yazough</i>	69
Infinitely many solutions for nonlinear perturbed fractional boundary value problems <i>Shapour Heidarkhani</i>	88
Towards a local definition of <i>body</i> in Continuum Mechanics <i>Néstor León D., Óscar López Pouso and José A. Oubiña</i>	104
Simulation of flow discharge on Danube River <i>Petre Băzăvan</i>	129
Existence and multiplicity of solutions for a class of isotropic elliptic equations with variable exponent <i>Ionela-Loredana Stăncuț and Cristian Udrea</i>	138
