1.	MATERIALS TECHNOLOGY OF PLASTICS	13
1.1	Generals	13
1.1.1	Definitions	14
1.1.2	Application of polymers	14
1.1.3	Nomenclature of polymers	15
	1.1.3.1 Nomenclature Based on monomer source	15
	1.1.3.2 Based on polymer structure	16
1.2	Classification of polymers	16
1.2.1	Classification by chain structure	16
1.2.2	Classification by Thermal Behavior	17
	1.2.2.1 Elastomers	17
	1.2.2.2 Thermoplastics	18
	1.2.2.2.1 Thermoplastic High Density Polyethylene (HDPE) – Properties	19
	1.2.2.2.2 Thermoplastic Low Density Polyethylene (LDPE) – Properties	20
	1.2.2.2.3 Thermoplastic Polypropylene (PP)	21
	1.2.2.2.4 Thermoplastic Polyvinyl Chloride (PVC)	22
	1.2.2.3 Thermosets	23

1.3	Polymer structure	24
1.4	Main physical properties of polymers	26
1.5	HDPE pipes	30
1.6	Plastics Recognition	34
2.	PROCESSING OF THERMOPLASTICS	35
2.1	How polymers are made	35
2.1.1	Polymerization	35
2.1.2	Polymerization Terms	36
2.2	Extrusion of polymers	39
2.2.1	Generals	39
2.2.2	Equipment for Extrusion	41
2.2.2.1	Extruder screw	42
2.2.2.2	Feed Zone	43
2.2.2.3	Compression Zone	43
2.2.2.4	The Die Zone	44
2.2.2.5	Metering zone	44
2.2.2.6	Head Zone	45
2.2.3	Defects	46
2.2.3.1	Melt Fracture	46
2.2.3.2	Degradation	47
2.2.3.3	Contamination	47
2.2.3.4	Bubbles in the Extrudate	47
2.3	Welding of polymers	48
2.3.1	Heating element butt welding	48
2.3.1.1	Description of welding method	48
2.3.1.2	Description of variants	48
2.3.2	Heating element socket welding	49
2.3.2.1	Description of welding method	49
2.3.2.2	Description of variants	49
2.3.3	Hotgas welding	50
2.3.4	Extrusion welding	50
2.3.5	Infrared welding	51
2.3.6	Laser welding	51
2.3.7	Rotation friction welding	52
2.3.8	Vibration friction welding	52
2.3.9	Induction welding	53
2.3.10	High frequency welding	53
2.3.11	Microwave welding	54
2.3.12	Ultrasonic welding	54

2.4	Injection moulding of polymers	55
2.4.1	Thermoplastic and thermosets injection molding	55
2.4.1.1	Thermoplastics injection molding	55
2.4.1.2	Thermosets injection molding	56
2.4.1.3	Thermoset vs. Thermoplastic Injection Molding	56
2.4.2	Thermoset compression and transfer molding	57
2.4.3	Thermoset Transfer and Compression Molding Pros and Cons	58
3.	WELDED JOINTS AND TERMINOLOGY	63
3.1	Welded joints	63
3.1.1	Prolonging a pipe	63
3.1.2	Ramification for distribution	65
3.2	Terminology	66
4.	BASICS OF HEATED TOOL BUTT WELDING	79
4.1	Generals	79
4.2	Pre-Welding Preparatory Operations	80
4.3	Dummy Welds	81
4.4	The Welding procedure	81
4.5	Welding Equipment	88
5.	BASICS OF HEATED TOOL SOCKET AND SADDLE WELDING	97
5.1	Principle of the process	97
5.2	Types of polyfusion welding	99
5.3	Welding Technology	101
5.3.1	Preparation before welding process	102
5.3.2	Heating	104
5.3.3	Transposition	105
5.3.4	Joining and fixation	105
5.3.5	Cooling	106
5.4	Polyfusion welding parameters	106
5.4.1	Indicative values for PE and PP according	

	to DVS 2207 – Parts 1 and 11	106
5.4.2	Indicative values for PB according to the Pipe-Life corporate literature	107
5.4.3	Indicative values for PVDF according to DVS 2207 – Part 15	108
5.5	Technological conditions after welding	109
5.6	Procedural mistakes in polyfusion welding	109
5.7	Welding equipment	110
6.	APPLICATION OF HEATED TOOL WELDING	111
6.1	Effect of material	111
6.2	Welding of sheet and pipe	112
6.3	Selection of heated tool butt, socket and saddle welding	117
7.	BASICS OF ELECTROFUSION WELDING	119
7.1	Generals	119
7.2	Application	121
7.3	Parameters of welding process	121
7.4	Welding equipment	122
8.	BASICS OF ELECTROFUSION SOCKET AND SADDLE WELDING	125
8.1	Principle of electrofusion socket welding process ..	125
8.1.1	Pre-Welding Preparatory Operations	126
8.1.2	Dummy Welds	126
8.1.3	The Welding procedure	126
	8.1.3.1 Preparation of the pipe and of the fitting	126
	8.1.3.2 Welding steps	129
	8.1.3.3 Welding parameters	131
8.2	Principle of the electrofusion saddle welding process	132
8.2.1	Pre-Welding Preparatory Operations	132
8.2.2	Dummy Welds	133
8.2.3	The Welding procedure	133
	8.2.3.1 Preparation of the pipe and of the fitting	133

	8.2.3.2	Welding steps	133
	8.2.3.3	Welding parameters	136
9.	APPLICATION OF ELECTROFUSION WELDING		137
	9.1	Effect of material	137
	9.2	Welding of sheet and pipe	138
	9.3	Selection of heated tool butt, socket and saddle welding	143
10.	HEALTH AND SAFETY		145
	10.1	General on Polymer health and safety issues	145
		10.1.1 Main causes of injury	145
		10.1.2 Necessary safety controls	147
		10.1.3 Personal safety equipment	148
		10.1.4 Administrative controls	149
	10.2	Burns and fires	149
	10.3	Fume control	150
	10.4	Safe lifting/handling	151
	10.5	Basic personal protection	154
	10.6	Consequences of misapplying critical welding parameters	155
11.	TESTING WELDS AND JOINTS		157
	11.1	Generals	157
	11.2	Visual inspection	159
	11.3	Bending test	160
	11.4	Tensile test	164
12.	WELD IMPERFECTIONS		169
	12.1	Generals	169
	12.2	Types of imperfection and their origins	169
		12.2.1 Mis-alignment between fittings and pipe and pipes between	169
		12.2.2 Not leaned burr	170
		12.2.3 Low burr	172
		12.2.4 Deformed burr	172
		12.2.5 Unequal burrs	173
		12.2.6 Angular mis-position	173
		12.2.7 Cracks	174
	12.3	Effect of imperfections on performance	175

12.3.1	Mis-alignment between fittings and pipe and pipes between	175
12.3.2	Not leaned burr	175
12.3.3	Low burr	175
12.3.4	Deformed burr	175
12.3.5	Unequal burrs	176
12.3.6	Angular mis-position	176
12.3.7	Crack	176
12.4	Acceptance criteria	176
12.4.1	Mis-alignment between fittings and pipe and pipes between	177
12.4.2	Not leaned burr	178
12.4.3	Low burr	178
12.4.4	Deformed burr	179
12.4.5	Unequal burrs	179
12.4.6	Angular mis-position	179
13.	DOCUMENTATION	181
13.1	Generals	181
13.2	Welding Procedure Specification	182
13.3	Completing welding reports	182
13.4	Manual and automatic reports	182
14.	REFERENCES	185
