

## Table of contents

New generalized inequalities using arbitrary operator means and their duals <i>Leila Nasiri and Mojtaba Bakherad</i>	1
Matrix map between complex uncertain sequences <i>Sangeeta Saha, Binod Chandra Tripathy, and Santanu Roy</i>	10
Boundary value problem for nonlinear fractional differential equations involving Erdélyi–Kober derivative on unbounded domain <i>Maria Titraoui and Yacine Arioua</i>	18
Stability of probability of return on locally compact groups under quasi-isometry <i>Barmaki Mohammed, Ftouhi Mostafa, and Driss Gretete</i>	32
Fast growing solutions of linear differential equations with analytic coefficients in the unit disc <i>Mohamed Abdelhak Kara and Benharrat Belaïdi</i>	37
On the key-exchange protocol using real quadratic fields <i>Abdelmalek Azizi, Jamal Benamara, Moulay Chrif Ismaili, and Mohammed Talbi</i>	53
Boundary stabilization of an overhead crane with beam model <i>My Driss Aouragh, Samir Khallouq, and M'hamed Segaouiq</i>	63
The total edge Steiner number of a graph <i>J. John</i>	78
Approximation for multi-quadratic mappings in non-Archimedean spaces <i>Abasalt Bodaghi, Somaye Salimi, and Ghasem Abbasi</i>	88
On dual jet $N$ -linear connections in the time-dependent Hamilton geometry <i>Alexandru Oană and Mircea Neagu</i>	98
High-gain adaptive boundary stabilization for an axially moving string subject to unbounded boundary disturbance <i>Belgacem Tikialine, Abdelkarim Kelleche, and Hadj Ammar Tidjani</i>	112

On strong lacunary summability of order $\alpha$ with respect to modulus functions	127
<i>Ibrahim S. Ibrahim and Rifat Çolak</i>	
New inequalities for operator monotone functions	137
<i>Silvestru Sever Dragomir</i>	
Survey on handling passive nodes in MANETs	146
<i>Mihaela Ilie</i>	
A statistical framework for evaluating convolutional neural networks. Application to colon cancer	159
<i>Liliana Popa</i>	
Pattern recognition based on multiple attribute decision making in intuitionistic fuzzy environment	167
<i>Ion Iancu</i>
