

CONTENTS

<i>CPC-Founded Clarification of Decline of the Effectiveness of the Energy Transfer in Power Systems – Leszek S. Czarnecki.....</i>	1
<i>Optimal Shape of DC Electromagnet – Alin-Iulian Dolan.....</i>	9
<i>Testing a Filtering and Regeneration System on a Recuperative Stand – Alexandru Bitoleanu, Mihaela Popescu, Vlad Constantin Suru.....</i>	14
<i>DC-Traction Substation with Improved Power Quality and Regeneration Capability – Mihaela Popescu, Alexandru Bitoleanu, Constantin Vlad Suru, Mircea Dobriceanu.....</i>	22
<i>Static Force Characteristic and Thermal Field for a Plunger-Type AC Electromagnet – Ioan C. Popa, Alin-Iulian Dolan, Constantin Florin Ocoleanu.....</i>	29
<i>Diminishing the Computational Burden when Analyzing Electrical Signals with Long Wavelet Filters – Ileana Diana Nicolae, Petre-Marian Nicolae, Ionuț-Daniel Smărândescu.....</i>	34
<i>Hybrid Systems Modeling Approach with Petri Nets – Mircea-Adrian Drighiciu.....</i>	40
<i>Estimation of Certain Power in Single-phase Network and DC Circuits – Constantin Daniel Oancea.....</i>	48
<i>Dynamic State of Low Power Asynchronous Motors in Direct-on-Line Starting – Ion Vlad, Aurel Câmpeanu, Sorin Enache, Monica-Adela Enache.....</i>	54
<i>Aspects Regarding Operation of Power Supply System of Cars – Sorin Enache, Aurel Câmpeanu, Ion Vlad, Monica-Adela Enache.....</i>	60
<i>Design Optimization of an Asynchronous Motor Used in Light Railway Traction – Presură Raluca-Cristina, Nicolae Marian-Ștefan, Vlad Ion, Nicolae Petre-Marian.....</i>	66
<i>Contributions to the Development of Complementary Equipment for the Romanian Anti-Hail System – Gheorghe Manolea, Laurențiu Alboteanu, Sorin Stepan... ..</i>	74
<i>Analysis of Crimped Connections Heat Transfer Coefficient Using Experimental and Numerical Determinations – Constantin Florin Ocoleanu, Ioan C. Popa.....</i>	81
<i>Modelling and Synthesis of Printed Circuit Boards Testing Systems based on Timed Hard Petri Nets – Sudacevschi Viorica, Ababii Victor, Calugari Dimitri, Bordian Dimitrie.....</i>	87
<i>Modeling and Simulation of the Coal Flow Control System for the Longwall Scraper Conveyor – Maria Brojboiu, Virginia Ivanov.....</i>	93
<i>Analyzing Signals from a Primary Winding of a Locomotive Transformer with Three Types of Wavelet - Based Transforms – Ileana Diana Nicolae, Radu-Florin Marinescu, Petre- Marian Nicolae, Diana Cristina Marinescu.....</i>	98

<i>Shielding Effectiveness Measurement Using a DTEM Cell – Viorica Voicu, Ion Pătru, Livia-Andreea Dina, Petre-Marian Nicolae, Relu Aipu, Ionuț Daniel Smărândescu.....</i>	107
<i>Synthesis of the PID Algorithm for Control the Thermal Regime in the 3D Printer – Irina Cojuhari, Bartolomeu Izvoreanu, Ion Fiodorov, Dumitru Moraru.....</i>	115
<i>Analysis of Direct Current Motors in Dynamic Regimes Using Numerical Techniques – Ioana-Gabriela Sîrbu, Lucian Mandache.....</i>	122
<i>Control of Flow and Pressure in the Cooling Water Circuit of a Thermal Power Plant Using Fuzzy Logic – Radu Cristian Dinu, Cristian Bratu, Daniela Popescu.....</i>	128
<i>The Influence of the Output Current Deforming Regime on the Input Current Harmonics for a Three-Phase Rectifier Bridge – Mitică Iustinian Neacă.....</i>	136
<i>Theoretical and Practical Aspects Regarding Radiated Emission Testing in Semi-Anechoic Chambers – Livia-Andreea Dina, Viorica Voicu, Petre-Marian Nicolae, Ionuț Daniel Smărândescu.....</i>	143
<i>Optimization of the Aerodynamics Airfoils Placed in Supersonic Viscous Flow – Victorița Rădulescu.....</i>	149
<i>Monitoring System for Reducing the Electric Equipment Stress in Transport and Distribution Lines – Virginia Ivanov, Maria Brojboiu, Sergiu Ivanov.....</i>	156
<i>Technical and Economic Analysis of Thermal Energy Storage in the Biomass CHP Plants with ORC Technology – Pavel Atănăsoae, Radu Pentiuc, Crenguța Bobric, Elena Olariu, Valentin Martin.....</i>	162
<i>The Implementation and Validation of a Bidirectional PWM Boost Rectifier Control Algorithm – Ionuț Deaconu, Constantin Vlad Suru, Mihăiță Lincă, Cristina Alexandra Preda.....</i>	168
