Table of contents

High order numerical treatment of the Riesz space fractional advection-dispersion equation via matrix transform method
Abdollah Borhanifar and Sohrab Valizadeh 1

Existence of positive solutions for an elliptic system with sign-changing weights
S. Shakeri 15

On a fractional operator of adjoint hybrid fractional derivative operator
Mine Aylin Bayrak and Ali Demir 21

Theoretical analysis and numerical simulation of a weak periodic solution for a parabolic problem with nonlinear boundary conditions
Abdelwahab Elaassri, Kaoutar Lamrini Uahabi, Malika El Ghabi, Abderrahim Charkaoui, and Nour Eddine Alaa 40

An inverse problem of reconstructing the unknown coefficient in a third order time fractional pseudoparabolic equation
Mousa J. Huntul, Ibrahim Tekin, Muhammad K. Iqbal, and Muhammad Abbas 54

Almost lacunary statistical and strongly almost lacunary convergence of order (β, γ) of sequences of fuzzy numbers
Naim Latif Braha, Mikail Et, and Yavuz Altın 82

Approximation behaviour of generalized Baskakov-Durrmeyer-Schurer operators
Nadeem Rao, Mohd Raiz, and Vishnu Narayan Mishra 90

Cauchy-Schwarz inequality for shifted quantum integral operator
Andrea Aglić Aljinović, Lana Horvat Dmitrović, and Ana Žgaljić Keko 106

Coupled systems of conformable fractional differential equations
Samir Aibout, Abdelkrim Salim, Saïd Abbas, and Mouffak Benchohra 118

Semihypergroup actions by using the generalized permutations
B. Davvaz and M. Mostafavi 133

Iterative algorithm using decoupling method for third-order tensor deblurring
Karima El Qate, Souad Mohaoui, Abdelilah Hakim, and Said Raghay 150

On lacunary $\mathcal{I}$-convergence almost surely of complex uncertain sequences
Amit Halder and Shyamal Debnath 167

Existence and asymptotic behavior of a nonlinear axially moving string with variable tension and subject to disturbances
Abdelkarim Kelleche and Athmane Abdallaoui 180

Hermite-Hadamard inequalities for generalized $(\mathfrak{m} - \mathrm{F})$-convex function in the framework of local fractional integrals
Arslan Razzaq, Iram Javed, Juan E. Nápoles V., and Francisco Martínez González 198

A sequence of weak solutions for a nonlinear equation involving Hardy potential
Saeid Shokooh 223

Relative uniform convergence of quantum difference sequence of functions related to the ℓ_p-space
Diksha Debbarma and Binod Chandra Tripathy 234

Global existence and exponential decay for a swelling porous-heat system subject to a distributed delay
Madani Douib, Houssem Eddine Khochemane, and Salah Zitouni 243

A Fisher-type evolution equation with applications in image processing
Bogdan Maxim 255
