

Table of contents

Several characterizations of the 4-valued modal algebras <i>Aldo Victorio Figallo and Paolo Landini</i>	154
Congruence relations on pseudo BE-algebras <i>A. Rezaei, A. Borumand Saeid, A. Radfar and R. A. Borzooei</i>	166
Strongly nonlinear variational parabolic initial-boundary value problems <i>Youssef Akdim, Abdelmoujib Benkirane, Mostafa El Mounni and Aziz Fri</i>	177
Solving nonlinear fractional differential equations using multi-step homotopy analysis method <i>Hassan Al-Zou'bi and Mohammad Zurigat</i>	190
Growth of certain combinations of entire solutions of higher order linear differential equations <i>Zinelâabidine Latreuch and Benharrrat Belaïdi</i>	200
On fuzzy real valued asymptotically equivalent sequences and lacunary ideal convergence <i>Bipan Hazarika and Ayhan Esi</i>	209
Generalized Hermite-Hadamard type integral inequalities for s -convex functions via fractional integrals <i>Mehmet Zeki Sarikaya and Fatma Ertugral</i>	226
Sinc-Legendre collocation method for the non-linear Burgers' fractional equation <i>Kamel Al-Khaled</i>	234
Survey on distributed approaches to swarm intelligence for graph search problems <i>Sorin Ilie</i>	251
Socket extensions for esoteric languages <i>Radu Dragoș and Diana Haliță</i>	271
Hilbert-Pachpatte-type inequality due to fractional differential inequalities <i>Josip Pečarić and Predrag Vuković</i>	280
Nonlinear analysis on elliptic curves subspaces with cryptographic applications <i>Oana Adriana Țicleanu</i>	292
