Table of contents

Generalized $\Phi-$dichotomous linear part for a class of generalized differential equations 1
Rabha W. Ibrahim, Sayyedah A. Qasem, and Zailan Siri

On the data completion problem for Laplace's equation 11
Chakir Tajani and Jaafar Abouchabaka

[p,q]-order of solutions of complex differential equations in a sector of the unit disc 37
Mohamed Amine Zemirni and Benharrat Belaïdi

Some new inequalities of Jensens type for operator s-convex functions 50
Marziyeh Sahfiei and Amir Ghasem Ghazanfari

Decomposition of A-ideals in MV-modules 66
Simin Saidi Goraghani and Rajab Ali Borzooei

The radical-depended graph of a commutative ring 78
Batool Zarei Jalal Abadi and Hosein Fazaeli Moghimi

Mathematical model of mosquito populations dynamics with logistic growth in a periodic environment 86
Bakary Traoré, Boureima Sangaré, and Sado Traoré

A Gibbs sampler in a generalized sense, II 36
Udrea Paun

Ground state solutions and concentration phenomena in nonlinear eigenvalue problems with variable exponents 122
Vasile Florin Uţă

LoRi-TTM cryptosystem 137
Miroslav Kureš, Thibault Decome, and Ghislain Drecourt

Improving extreme learning machine performance using ant colony optimization feature selection. Application to automated medical diagnosis 151
Robert Berglund, Smaranda Belciug

On supporting cancer grading based on histological slides using a limited number of features 156
Dumitru Bogdan Mateis Boruz, Catalin Stoean
