CONTENTS Vol. XI, No. 2 – 2015

- Assessment of body cell mass in Indian junior elite players (male) of different sports using bioelectrical impedance analysis method** 2533
Swapan Kr Dey, Abhishek Bandyopadhyay, Sujata Jana, Subhra Chatterjee (Nee Karmakar)
- Comparison between selected anthropometric indices of patients with cancer and age matched apparently healthy individual** 2541
Ojoawo AO, Awogboro OI, Ayoka A, Adeniran SA, Ogundele A
- Comparison of high-intensity interval training and resistance training on cardiac structure** 2547
Zahra Sayevand, Yaghoub Mehri Alvar, Naser Heidari, Ali Gheraat
- The evaluation and results of the surgery in the acromioclavicular joint dislocations** 2553
Ali Ata, Murat Yilmaz, Melih Malkoç, Özgür Korkmaz, Akın Uğraş, Ercan Çetinus
- Exercise induce oxidative stress in rats kidney** 2558
Radu MD, Schiopu S, Tută Liliana-Ana, Chirică R
- Body composition and pulmonary functional correlates in Nigerian male amateur boxers** 2563
Oke Kayode I, Agwubike Elias O
- Relationship between anthropometric variables and elbow flexor muscle strength at varying hip joint angle in apparently healthy young adults** 2569
Rufus A. Adedoyin, Gabriel O. Ayeni, Michael O. Olagbeg, Oluwasegun A. Ayeni
- Compared 2 method of resistance training (traditional and body pump) on the vertical jump and balance in male basketball players 16-18 years** 2575
Salimi H, Barati A H, Adibpour N, Shahid Rajaei
