

Table of contents

Characterization of finite extensions / Caractérisation des extensions finies <i>El Hassane Fliouet</i>	249
On lacunary strongly almost convergent double sequences of fuzzy numbers <i>Binod Chandra Tripathy and Mausumi Sen</i>	254
A new variable shape parameter strategy for Gaussian radial basis function approximation method <i>Mojtaba Ranjbar</i>	260
Existence of entropy solutions for some strongly nonlinear $p(x)$ -parabolic problems with L^1 -data <i>Hassane Hjjaj, Elhoussine Azroul, and Badr Lahm</i>	273
Existence of renormalized solution for a class of Doubly nonlinear parabolic equation with nonstandard growth <i>Lahmi Badr, El Haiti Khalid, and Abbassi Adil</i>	300
Existence of solution for Liouville-Weyl fractional Hamiltonian systems <i>César E. Torres Ledesma</i>	318
Multiple positive periodic solutions for a delayed predator-prey system with Beddington-DeAngelis functional response and harvesting terms <i>YanQin Wang and Qingwei Tu</i>	330
Local bifurcations of a ratio-dependent predator-prey system with Holling type III functional response <i>Qiuyan Zhang</i>	339
Entropy solutions for anisotropic nonlinear Dirichlet problems <i>Idrissa Ibrango and Stanislas Ouaro</i>	347
Statistical considerations on the k -means algorithm <i>Dana Mihai and Mihai Mocanu</i>	365
Some weighted Gruss-type inequalities with not necessarily positive weights on time scales <i>Cristian Dinu</i>	374
A fuzzy mathematical multi-period multi-echelon supply chain model based on extension principle <i>Seyed Hadi Nasseri, Iraj Mahdavi, Zahra Alizadeh, Raheleh Nourifar</i>	384
On the existence of infinitely many solutions of a nonlinear Neumann problem involving the m -Laplace operator <i>Ionela-Loredana Stăncuț</i>	402
Cubic differential systems with an invariant straight line of maximal multiplicity <i>Alexandru Șuba and Olga Văcăraș</i>	427
Spherical functions on transitive groupoids <i>Touré Ibrahima and Kangni Kinvi</i>	450
