

Table of Contents

Applied Mechanics, Modeling and Simulation in Mechanical Engineering

| | |
|---|----|
| Ellipse's versier –structure and kinematics of the generator mechanism..... | 14 |
| Dynamic Optimization of the Controller for the Active Suspension System of a Race Car | 15 |
| Joints friction in a mobile transversal coupling | 16 |
| Design of a Parameterized Mannequin Using Rapid Prototyping Technology .. | 17 |
| Kinematic and dynamic analysis of a mechanism for assisting human locomotion | 18 |
| Selective Laser Sintering of Ti Alloy Powders for Hip Implants | 19 |
| Stresses in Prosthetic Elbow Joint During Flexion-Extension Movement..... | 20 |
| About obtaining a personalized three-dimensional model of a patient using CT images | 21 |
| Modeling and simulation of an orthodontic system of a real patient starting from CBCT images | 22 |
| Analysis of four-bar linkage mechanism in classical and its compliant form - comparison | 23 |
| Applications of Some Extremal and Variational Problems to the Study of Vibrations in Mechanical Systems..... | 24 |
| Structure-Related Non-Uniformities in Composite Bars Made of Hybrid Dammar-Based Resin and Reinforced with Natural Fiber Fabrics | 25 |
| Adding some Remarks Concerning the Dzhanibekov Effect..... | 26 |
| Design of double oscillating sliding mechanism..... | 27 |
| Advanced Design Optimization Procedures for Worm Gear Drives | 28 |
| Analysis and design of a historical bicycle mechanism, without chain | 29 |
| FEM Analysis of a Robotic System used in Concrete Spray Procedures | 30 |
| Computer-Aided Kinematic Analysis of Two-Movement Follower Mechanism | 31 |
| Analysis of a Cantilevered Beam under Parametric Uncertainties | 32 |
| Analyzing Double Pendulum Dynamics with Approximate Entropy and Maximal Lyapunov Exponent..... | 33 |

| | |
|--|----|
| Navigation testing procedures for the ENDORO robotic system | 34 |
| Analysis of a Cantilevered Beam using FEMCAS | 35 |
| Analysis of a Cantilevered Beam under Parametric Uncertainties | 36 |

Automotive, Transportation and Traffic

| | |
|--|----|
| Intelligent Transport Systems Used in Inland Waterway Transport and Their Contribution to Pollution Prevention | 38 |
| Comparative Analysis of Pedestrian Throwing Distance Following a Collision with a Vehicle | 39 |
| Pollution Caused by Thermal Engines when using Biofuels | 40 |
| Modeling The Characteristics Of An Electric Propulsion System For A Small Vehicle | 41 |
| Study of CO ₂ emissions in platoon driving..... | 42 |
| Research regarding of the autonomy of the electric vehicles in WLTC test cycle | 43 |
| Aspects of measuring brake parameters on heavy trucks using a roller brake stand | 44 |
| Study of the influence of speed and type of road on vibrations transmitted to an electric tractor driver | 45 |
| Night-time experiments on driving RHD vehicles in LHD traffic conditions and pedestrian crossing safety..... | 46 |
| CAE approach in combustion modeling on a classic internal combustion engine and ignition timing modeling | 47 |
| Integrating the Circular Economy in Forming the Future Naval Engineers | 48 |
| Study Concerning Contact Strain and Stresses in Radial-Axial Bearings | 49 |
| Microwave heating of exhaust systems from combustion engines for reducing NO _x during cold start..... | 50 |
| Analysis of CO ₂ emissions for a supercharged engine and a series-parallel hybrid system | 51 |
| Experimental Stand to Investigate the Sealing Properties of Piston Rings Used in Automotive Industry | 52 |
| Determination of the Probability of Failure of the Starter of a Passenger Car.... | 53 |
| Causes of traffic accidents | 54 |
| Fatigue Analysis of the Input Shaft of a Transaxle for a Passenger Car..... | 55 |
| Consideration on new application for rotary engine | 56 |

| | |
|--|----|
| Study of Heat Transfer in the Walls of the Body Superstructure of a Vehicle for Transporting Frozen Meat Carcasses | 57 |
|--|----|

Production Systems, Management and Materials

| | |
|---|----|
| Studies on the influence of process technological parameters on geometric accuracy in 3D printing of PLA parts by FFF printing technology | 60 |
| Study of the stop phenomena at the end sliding plate movement with reciprocating rectilinear motion driven by direct current motors..... | 61 |
| The Influence of Sliding Pressure Operation on some Elements of the Thermal Cycle | 62 |
| About some mechanical properties of composites with an epoxy resin matrix and natural reinforcements | 63 |
| Sintered CuSn alloy with mechanical properties improved by the addition of Zirconium..... | 64 |
| Microstructural investigations of 3D printed reinforcing network in recycled silicone rubber composites..... | 65 |
| Internal Turning of the Polytetrafluoroethylene (Teflon) at High Feed..... | 66 |
| Evaluation of Residual Stress in Specific Welded Nodes of River Ships..... | 67 |
| Differential thermal analysis in microwave hybrid field of some composite ceramic materials | 68 |
| Analysis of turning process of pure titanium using Finite Element Method.... | 69 |
| Analysis of milling process of aluminium alloy using Finite Element Method | 70 |
| Surface roughness analysis using Sample Entropy | 71 |
| A Comparative Approach on Successive vs Simultaneous Drilling | 72 |
| Implementation of the Lean Manufacturing 6S Technique – Case Study..... | 73 |

Civil engineering

| | |
|---|----|
| Evaluation methods of energy performances in buildings | 76 |
| Study of the Influence of the Thermal Insulation System on the State of Stress, Deformation and Vibration of a Rehabilitated Building with a Structure of Reinforced Concrete Frames..... | 77 |
| Study on the comfort microclimate at the educational building in research laboratories..... | 78 |
| The Link between Historical Research and Structural Rehabilitation in the Case of Palace Building from Craiova | 79 |
| Strategy for Facade Restoration in Case of Craiova's City Hall Building | 80 |

| | |
|---|----|
| Using Winkler Hypothesis in ETABS Software for the Case of Building Structures with Raft Foundation | 81 |
| Software Application for Stiffness Relaxation New Method of Bouc-Wen histeresys differential model used in simulation of Roumanian Friction Dampers | 82 |
| Dynamic Seism Analysis of a Medium-height Building Equipped with Two Variants of Antiseismic Dampers | 83 |
| Influence of Damping Coefficient Value of Fluid Viscous Dampers on Seism Behavior of a Ten Stories Building Using ETABS Software | 84 |
| New Strength Degradation of Bouc-Wen Histeresys Differential Model for Romanian Anti-Seismic Devices Used in Buildings Seism Protection Systems | 85 |
| Integrated AHP and SAW methods for selection green building materials for insulations | 86 |
| Comparison Between the Results Obtained in Static and Modal Seism Simulation of Tall Buildings Using ETABS..... | 87 |
| Concrete pavers with addition of recycled glass | 88 |
